

The Way To Set & Service Light Poles

We can set two 30' light poles
in less than 9 MINUTES!

DON'T BELIEVE US?

Watch our prototype in action www.lightpoledancer.com

Created by an Electrician for Electricians

After setting and servicing light poles for over twenty-five years spending thousands of dollars renting expensive bucket trucks and dangerous tow-behind lifts, an experienced electrical contractor has finally created the innovative tool called the Pole Dancer™.

The award-winning Pole Dancer™ is a lightweight, portable tool that will install or service up to forty-foot pedestal-mounted light poles eliminating the need to rent or purchase boom trucks or other expensive lifting equipment. The Pole Dancer™ can be transported in the back of a truck or van or it can be attached directly to a trailer hitch. It is designed to service or set poles with or without a pole base. It has an 800 pound load limit.

Crafted from high-grade aluminum alloy, the durable Pole Dancer™ will save time and money for years to come. Most importantly, it is designed to keep your feet on the ground while setting or servicing light poles.

Each Pole Dancer includes:

- Bucket of Patented Straps for up to 40' Poles
- Rechargeable Battery Pack with Quick Connect Wiring
- 12v Hoist with Remote
- 60' 3/16 Wire Rope Assembly with Rated Hook
- 2 Pole Base Ratchet Straps
- Hitch Assembly
- 5', 9' Booms
