When I first watched the video of the Pole Dancer quickly setting poles with ease, I must admit that I was a little skeptical. However, after watching our guys step up with very little training and easily use it, I have become a big fan. The product is amazing and I have nothing short of high praise for it! It was the best thing at the IEC trade show last October in Louisville, Kentucky.

Tony Fuller, Project Manager

So far, we successfully set 21 poles on two job sites with the Pole Dancer. These two jobs have already paid for our Pole Dancer. We are so excited about this product; we have a picture of the Pole Dancer setting poles at a car dealership hanging up in our office!

Tom Clay, Estimator

We have dramatically reduced our costs because now there is no need for a crane truck and all of the extra costs that come with it: fuel, maintenance, insurance, and a CDL license. The Pole Dancer also eliminates the need to ever rent a crane or a bucket truck to set or service light poles. It was very easy to set up, handle and transport. Just put it in the back of a pickup truck and head to the jobsite.

Robert Layman, President

We highly recommend this product!
