**RE:**

To Whom It May Concern:

March 25, 2013

Coming from a company that installs a ton of light poles, the Pole Dancer has been a great addition to our tool box.

We have saved enough on crane and boom truck service to pay for the unit in less than six months. Not only have we save money on service, but on man hours also. No more waiting on cranes or boom trucks, we can work on our schedule.

We install 25 and 28 foot square steel poles weighing (with fixtures) around 600lbs safely and with no problems.

I would recommend this tool to anyone who is serious about pole lighting!

Best Regards,

David Powell  
Construction Manager
