Light Pole Dancer
4098 E Prince Rd.
Farmville, NC 27828

Jarrett,

We truly appreciate the extra work and time you spent with us training our men in safety and use of the "Pole Dancer". I feel that you went above and beyond your responsibility working with our men to ensure that they were comfortable in the use of the "Pole Dancer".

The "Pole Dancer is a valued addition to our service department. Due to its design, it can go to where boom trucks and cranes cannot access. Its light-weight and portability are ideal for tennis courts and other costly and easily damaged surfaces.

It does everything that you said it would do. We were able to take down 30' steel poles with 4 heads, quickly and safely.

I would highly recommend this to anyone who is serious about pole lighting.
